

STATE-OF-THE-ART KARAOKE ENTERTAINMENT CENTER

 We have been committed to developing the traditional karaoke system, considering the needs of users, and making it a better and more humane karaoke form. After

SING EASY KSVP3

launching two commercial versions and receiving a large number of requests from customers for the home version, the team decided to develop a third-generation state-of-the-art entertainment system with new features for home users to enjoy any type of entertainment anytime, anywhere at home, such as singing, watching YouTube, Netflix, third-party IPTV services, listen to Spotify, Joox and QQ music, and even browse the web using Google Chrome from a single device. On top of the second-generation languages (English, Traditional Chinese, Simplified Chinese, Japanese, Korean, and Malay) we added Thai, Hindi, Burmese, Vietnamese, Filipino, Portuguese, Russian and Arabic as well as new features to the third-generation new user interface language enabling home users around the world to use the karaoke system in their native language.

FEATURES

- Artificial intelligence powered KTV generator
- Quick switch available 15 user interface languages
- Sing in Traditional Chinese, Simplified Chinese, English, Thai, Russian, Italian, French, etc
- Search songs by writing song native language no matter Japanese, Korean, Russian, Thai, etc
- Third-party value-added apk (GoTV and HDTV requires service subscriptions)
- Queue YouTube selections on the same Karaoke queue list

HIGHLIGHTS

Over 330,000 Songs

Discover a diverse range of more than 330,000 high-quality songs with original music videos & lyrics in multiple languages at Sing Easy via the cloud platform.

Weekly Updates

Experience the joy of singing along to the most recent hits with our ever-expanding song catalog and regular software updates automatically every week.

Remote Control

Simple and easy to use smartphone and tablet control: Just scan the QR Code to connect your smartphone or tablet to pick from a catalog songs and singers, while also being able to pause or skip songs, adjust the volume, etc.

TV Screen Interaction

Send gifts, emojis, banners or even type in a message to show on the TV screen as well as choosing a female, male or children voice to read it loud for you. A very fascinating way to congratulate someone on their birthday or even to ask someone to marry you. Check out the smartphone and table control for more information.

Sing Offline

Allows you to download your favorite songs and play them offline. You can store up to 100,000 songs on your KSPV3 and keep the party going even without an internet connection!

AI KTV GENERATOR FEATURE (BETA)

Regardless of how old or how fresh the song is, the Sing Easy KSVP3 AI KTV Generator feature claims to be able to assist customers in singing their favorite song when it isn't in our music database.

FEATURES

- Easy-to-use
- Artificial Intelligence Powered
- Vocal Eliminator

BACK-END INTERFACE

Sing Easy users just need to select their song by scanning the QR code that is shown on the TV. At the top of the list, Sing Easy K+ will display the selected song that is available in the databank. Moreover, K+ will search through all songs that are available online and present a cloud including the words AI that are available for KTV songs that are generated by AI.

Simply click the AI-enabled cloud to choose the background video, then click OK. K+ will then instantly build an AI-generated KTV video with lyrics that will be online in a matter of minutes. Simultaneously, the K+ Vocal Eliminator AI technology smoothly removes vocals from audio and video files, enabling users to sing without the original vocalist's voice.
